

**Introducing!**  
**OUR NEW LINE**  
**of**  
**PLASMA-ELECTRICAL**  
*Noble Gas Tube Technology*

— **Rife/Lakhovsky/Lymphatic-Drainage Instruments** —

The *PHOTON SOUND BEAM* is unique in the rapidly emerging arena of Electromedicine! Since its conception in 1994, the *PHOTON SOUND BEAM* has been continually advancing – and many new components have been added without increasing the cost. This is a synthesis of 20 years of exploration and marketing of *Vibrational Energy Medicine Technologies* with a focus on the HOLISTIC and CLEANSING VALUE of *PlasmaElectrical Instruments*.

We are now excited to offer our new line of *PlasmaElectrical Technologies* that comprehend many of the different instruments available in the world today. This line of Lymphatic Drainage, Rife, and Lakhovsky Technology has *4 Levels* – each level with more expanded functions and control features.

The FOCUS of PlasmaElectrical Technology is to provide NATURALNESS, WHOLENESS and CLEANSING with the broadcast of *pure-waveform FREQUENCIES* and FREQUENCY HARMONICS. In this way, the body is *better prepared* to receive *frequency information* required for the ideal *resonance* and *energy state* of each cell.

Fundamentally “health” is simply a matter of *what gets into the cell* and *what is eliminated from the cell*. *Electro-Chemistry* plays a key role here. It orchestrates the transport of nutrients and the elimination of toxins – and this is directly related to the *electrical properties* of the cell.

NOW! With New 21<sup>st</sup> Century Technology and Design, and over 16 years of experiential observation, research and development, WE ARE INTRODUCING a WHOLE NEW LINE of Lymphatic Drainage, Rife, and Lakhovsky Technologies.

These PlasmaElectrical Instruments deliver NOURISHING – REVITALIZING – REGENERATIVE *Biological Levels of Micro-Current* which prepare the body to accept and integrate the FULL-HARMONIC FREQUENCY INFORMATION necessary to re-establish normal cellular resonance, devitalize pathogens, and

created balance. They are EASY-TO-USE and PROVIDE AN OBSERVABLE, RAPID RESPONSE!

**2006 PLASMA-ELECTRICAL TECHNOLOGY**  
***Lymph - Lakhovsky - Rife***

*AFTER 70 YEARS of Research and Application of Technology created by early 20<sup>th</sup> Century geniuses, Georges Lakhovsky and Royal Raymond Rife, these effective BioElectrical Instruments are being offered at their contemporary best! – NOW! at 4 LEVELS of Instrumentation. These wrap-around Lymph/Lakhovsky/Rife Technologies FOCUS on the Delivery of **PlasmaElectricity** AND a pure-waveform **RF Rife/Lakhovsky Broadcast** with Glass Tube Applicators resulting in deep lymph/tissue cleansing and nourishment while enhancing the BIO-AVAILABILITY of Harmonically-Rich Frequencies. PlasmaElectricity results in the ELECTRICAL DISASSOCIATION of bound cells, bound protein and thick Lymph – in other words -- DECONGESTION. PlasmaElectricity also brings the delivery of frequencies to a much higher level of bio-availability and effectiveness.*

***ALL NEW 2006 PlasmaElectrical Line:***

These instruments are easy-to-use and provide extremely nourishing PlasmaElectrical Energy delivered thru Glass Tube Applicators filled with different Noble Gases. The Glass Applicators may be applied directly to the body, or used for distance broadcasting. The Noble Gases: Xenon, Argon, & Krypton are vehicles for Biological PlasmaElectricity as well as for Lakhovsky RadioWave Emissions, Photons and Subtle Energies provided by these unique elements.

The Glass Tubes deliver a bio-available, full-spectrum of Sound Frequencies, each rich in harmonics. With all our instruments, Sound and other Rife Frequencies are delivered by preparing the physiology FIRST; by allowing the action of extremely low microcurrent to dis-associate bound protein matter and bound cells. In this way, all the primary and subtle energy channels are opened-up, so that frequency information and subtle energies are actually received and integrated by the body effectively.

In a toxic world, the basis of all health protocols is cleansing and building. PlasmaElectrical Instruments deeply de-congest of all the body's tissues and fluids (lymph, blood, cerebral spinal fluid) on a quantum level. This allows the reception of complete frequency information which not only devitalizes the pathogens and parasites,

but more importantly *re-establishes the ideal resonance and energy state* of the body's healthy cells.

As a result, the Photon Sound Beam Instruments have demonstrated comprehensive effectiveness for serious health issues and for already healthy individuals alike.

## ***RE: Our Products and Rife Technology***

In general, there are **3 Modalities of Rife Technology**:

- (1) Those instruments which ***Ionize Noble Gas Tubes with a High Frequency Radio Wave*** OR ***“RF Broadcast Rife Technology”***
- (2) Those instruments which deliver ***Electrical Energy through Metal Rods and Plates*** OR ***Electrical Rod/Plate Rife Technology*** AND MORE RECENTLY,
- (3) Those instruments which deliver ***“Plasma-Electrical Energy through Noble Gas Tubes*** OR ***“Plasma-Electrical Rife Technology”***.

***RF Broadcast Rife Technology*** is a derivation of Raymond Rife’s 1930’s Beam Tube (now also called *Rife-Bare Technology* having contemporary digitalization and size). This classical Rife Technology utilizes Noble Gas Tubes which are ionized by a CB (300-500 Megahertz -near microwave) Radio Wave Frequency which is modulated by selected Rife Frequencies. In this way, frequencies which devitalize pathogens may be received at distances up to several feet.

***Electrical Rod/Plate Rife Technology*** originated in the 1950’s by John Crane (associate of Rife), and uses an electrical current delivered by metal hand-held *Rods* and/or *Foot-Plates*. Rife Frequencies are delivered through the Rods/Plates with a *high* micro-current electrical energy typical of many other instruments, including hand-held TENS units and CES units (such as Bob Beck’s *BT 7*). Because the electrical energy must overcome the resistance of metal rods and plates, it is not natural to the body and can only traverse the main conductive channels such as the blood vessels and nervous system, and does not penetrate as deeply especially into the more subtle energy channels.

***Plasma-Electrical Technology*** such as the ***Photon Sound Beam*** instruments use BOTH Noble-Gas glass tube applicators filled with Argon, Xenon, and Krypton, AND a gentle Radio Frequency Broadcast thru Crystal Oscillators (*RF*

*Sound Probe* attachment). These instruments are more holistic in nature. Rather than ionizing the gas tubes with a high RF signal (RF Rife Broadcast Technology), the glass applicators are ionized with a *high voltage/low amperage electrical current* from a Tesla-like Coils and are applied directly or near to the body. *Electrical Ionization* of these glass tubes yields a ***Biological Plasma-Electricity*** to deliver harmonically-rich Rife Frequencies in the mid-audio range. In this way, *devitalizing pathogens* and *deep tissue cleansing* occur AT THE SAME TIME. This is due to the nature of ***extremely low micro-current*** delivered by Noble Gas Tubes; it results in the ***Electrical Disassociation*** (breaking-up) of bound protein matter and stagnant cells with weak (-) electrical polarity. Most importantly it thins the lymph, blood and all the fluids to profoundly enhance their proper circulation.

***RF Broadcast Rife Technology*** and ***Electrical Rod/Plate Rife Technology*** focus on the “information” – OR, the “*frequency information*” which in some way *devitalizes the pathogens in the body*. Since they do not cleanse the body, they require various cleansing programs to assist with detoxifying the body of dead cell material, etc. These technologies are more “allopathic” in nature especially valuable with crisis intervention in a Stage 3 or 4 condition.

***Plasma-Electrical Instruments*** deeply decongest all the fluids and tissues of the body. As a result, the Rife Frequencies (and other harmonically-rich frequencies) are better received by the body. In other words, the frequency broadcast is much more ***bio-available***, because the body’s energy and information channels are open and flowing.

In general, there is a lot of extrapolation with the use of “*frequencies*”. Our approach is that “frequency information” may be *delivered* but it is not always *well-received* by the body, especially since the body is *already* bombarded by an estimated 10 million-times the *electromagnetic pollution* which existed in the 1930's.

Royal Raymond Rife and others simply used what technology was available at that time. In this case, it was a *CB Radio Wave Broadcast* (high wattage/high frequency) through a large Noble Gas Tube at several feet in distance from the individual, rather than apply smaller glass tubes directly onto the body. At such power wattage, maybe one *should* sit at a distance!

Receiving a treatment at distances of several feet using classical Rife Broadcast Technology (or contemporary Rife-Bare Technology) requires an enormous amount of energy and is severely minimized by Electromagnetic Pollution (random Radiowaves and dense chaotic electromagnetic fields) ... and what is the value? – just to get across that distance because that's how Lee Deforest did it for Rife in the 1930's?

This is where the ***LifePulse Pro*** Instrument excels! – This comprehensive 3-in-1 instrument uses a *much lower* RF Carrier at *much less power* with its Rife Broadcast Component. The Noble Gas glass applicators are applied *directly onto the body* and has the *cleansing capability* with an upgraded ***Photon Sound Beam*** component now with Alternating Output Polarity. ***LifePulse Pro*** also has as its 3<sup>rd</sup> component, high-quality Rods and Foot-Plates for Electrical Rife delivery.

Our new ***PlasmaElectrical Line*** of instruments begins with the basic economical unit – the ***Essential Photon Sound Beam***. This affordable unit is UP-TRADABLE with any of the higher priced models, such as the ***Photon Sound Beam 12*** – or the ALL NEW! ***Photon Sound Beam Infinity*** with 100 Selectable Frequency Programs. Or the ***LifePulse Pro***, which INTEGRATES the 2 Rife Modalities discussed above with Plasma-Electrical Broadcast in wonderful synergy!

## ***QUANTUM HEALING PACKAGES***

### ***COMBINING***

#### ***“2006 PlasmaElectrical Line”***

##### ***with Light and Subtle Energy Instruments***

**SAVE UP TO \$800** with our ***Quantum Healing Combination Packages***. These Packages create a *Quantum Synergistic Effect* by combining our PlasmaElectrical Instruments (above) with other technologies such as the Light Regenerative, *LightWave Wave Resonator I & II* or the Subtle Energy, *BioMirror Plus I & II*.

Our Primary Subsidiary Technologies are the *LightWave Wave Resonator I & II* and the *BioMirror Plus I & II*. The *LightWave Wave Resonator* is advanced Light Regenerative Technology and *BioMirror Plus* comprehends several contemporary Radionic (Subtle Energy) Protocols.

*LightWave Resonator I & II* combine Radio Frequencies with specific Light Wavelengths for IntraCellular penetration to activate the Cytochromes Oxidase Enzymes which generate ATP (Adenosine Tri-Phosphate) stored in the Mitochondria (energy factories) of each cell.

The intent of this light technology is “Quantum Regeneration”. It is ideally used AFTER the use of the PlasmaElectrical Technology, which opens all the energy/information channels FIRST. *LightWave Resonator I* has 3 Violet & 3 Blue diode-emitters. *LightWave Resonator II* has 13 Diodes (adds Green), complex interference-patterns, and stronger RadioWave Coupling.

*BioMirror Plus I & II* combine several contemporary Radionic approaches and applications ALL IN ONE INSTRUMENT, including “Holographic Radionics” and the

use of a “Rate Book”.

*BioMirror Plus I & II* may be connected to any one of our *PlasmaElectrical Instruments* and USED SIMULTANEOUSLY – combining Subtle Energy with a Bio-Energetic Session and even generating a VIBRATIONAL ESSENCE to represent/signature a session. *BioMirror Plus II* includes a Hardwood Case and Voice Potentizer – a 20 second endless-loop recording to add the *sound and intent* of one’s words to the Broadcast.
